RIDDLE MAGIC

What is a mouse's favorite place to vacation? Cheeseapeake Bay. Where do little cows eat lunch? In the calfeteria, of course! What is the name of the famous pig who discovered the theory of relativity? Albert Swinestein. Creating imaginative riddles like these is fun and easy with **Riddle Magic**.

Riddles challenge the mind and inspire creativity. As children invent riddles, they experiment with words, learning about homophones, related words, and words with multiple meanings. With **Riddle Magic** youngsters will enjoy writing and illustrating riddles, and can even design their own riddle books! This one will leave them laughing with language.

Features:

- Gives step-by-step instruction for creating riddles
- Provides three variations of the basic riddle-making method
- Contains a built-in 1800-word dictionary for riddle construction
- Includes a library of graphics for illustration and is also compatible with graphics from *The Print Shop*®
- Works with a wide variety of printers

Developed by Learning Well™
Riddle Magic was created by Mike Thaler and Janet Pullen.
Computer design by Santa Barbara Softworks.
